Project Definition

Title: E-service Platform for vehicle rentals in Udaipur.

Summary:

1. The primary aim is to transition **Bhakti Tours and Travels** in Udaipur to an e-service web platform, offering two-wheelers and four-wheelers for rent to tourists.

2. The site will feature an admin portal and a user interface for visitors.

3. Key functionalities include a login page, payment gateway, vehicle search and filtering, pre-booking, GPS tracking, and general information.

4. The goal is a fully functional online platform to streamline operations and enhance customer service.

Project Objectives:

1. The e-service web application will enable users to pre-book vehicles from anywhere in the world.

2. It will be an intuitive, responsive website ensuring a seamless user experience.

3. The platform will feature secure payment gateways and robust data protection.

4. Booking, payment, and customer management will be automated to enhance efficiency.

Project Scope:

What will be included?

- Registration and Authorization
- Vehicle catalog with search and filter functionality
- Pre-booking and Checkout process
- Payment integration
- GPS Tracking of rented vehicles
- Customer reviews and ratings
- Cancellation Policy
- Terms and conditions
